Industry With Internationally
Recognized Certifications**

About Us

Your Partner for Intelligent Solutions

Founded by experts with decades of relevant professional experience, intellcert GmbH, based in Berlin, Germany, offers a diverse range of services worldwide.

We aim to actively support you in improving your products', processes, and systems' safety, quality, and performance. We strive to minimise risks, enhance competitiveness, and build trust with customers and stakeholders. Our internationally recognised certificates open up new markets for you.

Operating in various industries and sectors, including industry, healthcare, education, energy, environment, and transportation, our dedicated and experienced team values expertise, reliability, and customer-centricity.

We don't see ourselves as service providers but as your trusted partner for "Business Excellence." We look forward to accompanying you on your path to success.

intellcert's Experience in Aviation

World-Class Experience, Local Support

With decades of accumulated founders' experience in the certification industry, intellcert GmbH is a globally recognised leader in helping companies navigate the complex world of aviation regulations and standards. From product-specific certifications to environmental and quality management systems, we offer comprehensive services designed to meet the highest international requirements.

intellcert works with leading aviation authorities, including EASA, FAA, ICAO, and IATA, to ensure that your organisation's processes, products, and systems comply with all relevant regulations. Our global reach allows us to provide tailored training and certification solutions, ensuring your company meets the standards required for market entry, safety compliance, and operational excellence.

Certification and Training Matters

In the highly regulated aviation industry, certifications are not just a formality but essential to ensuring the highest safety standards, quality, and operational efficiency. Aviation training and certifications help companies demonstrate their commitment to meeting international standards, which are critical for designing, manufacturing, maintaining, and operating systems related to the aviation and space industry.

Compliance with recognised certification standards, such as those from EASA, FAA, and ICAO, guarantees that aviation products and services are safe, reliable, and compliant with legal and environmental requirements. Furthermore, certification opens doors to international markets, building trust with regulatory authorities, airlines, and passengers worldwide.
